

Bona Prime Deep

Bona Prime Deep brings out that traditional deep colouration in wooden floors. The intense and even colouration in a low VOC primer is a truly unique combination only available from Bona.

Bona Prime Deep is ideal for creating stylish design results, especially for those appreciating that deep dimension to wooden floors. From Bona, with a passion for wooden floors, you can expect a deeper result.

Bona Prime Deep

Deep Floor Passion

Traditional Waterborne Primer

Bona Prime Deep

Bringing out that deeper colour

Now Bona brings you that special touch of deep colouration with no need for hazardous solvent-based formulas.

Wooden floors are unique by enhancing the personality of a room. Living wooden floors give a room a truly stylish design look. Solvent-based wooden floor treatments have traditionally given the floor a deep dimension. That deeper colouration can now be created with the non-hazardous formula of Bona Prime Deep.

Bona Prime Deep

Bona Prime Deep brings out that traditional deep colouration in wooden floors. The intense colouration in a low VOC formula is a truly unique combination only available from Bona.

Bona Prime Deep is a delight to work with. It has a long open time, enabling a relaxed application and the ability to work with larger surfaces. There is no risk of overlap, and the result is an even colouration of the wooden floor.
